

AGM 2015

Membership Report

This year, our new membership registration/renewal system was developed and implemented. Overall, members have reported that using the system has been easy and efficient. For this first year of using the new system only, it was required that all members first register in the new member portal to provide required information, as we were not able to transfer information from the previous system to the new one. A few people experienced some confusion because they missed seeing our request to first register in the new member portal. For subsequent renewals, this additional step will not be required and renewal should be easy for all.

It is important that, if your email address changes, you change it in your profile. Any form of registration through our website is facilitated by use of the email address that we have on file.

This year, we have made a concerted effort to update and verify all membership records. As such, we are able to confidently report the following current membership numbers:

Full Members	149	Distinguished Life Members	7
Student Members	33	Retired Full Members	2
Affiliate Members	19		

Respectfully submitted,

Teresa Sztaba, Ph.D., C. Psych.
Executive Director
